Evaluation

We would appreciate it if you could fill out the following evaluation form and turn it in to us. Of course there is no need to sign your name.

1. Rate the usefulness of the class on a scale from 1 (bad) to 5 (great).
2. What was the most useful aspect of the class for you?
3. What was the least useful aspect of the class?
4. Where there any specific topics you would have liked us to cover, or to emphasize more than we did?
5. Did your background match what we seem to have expected?

6. Did you find the balance between lecture and lab about right? Or would you have preferred more of one or the other?

7. Would you be interested in a follow-on class? If so, what specifically would you like to see covered?

8. Do you have any suggestions for us on other individuals or research labs who might be interested in attending a similar class?

Please add any additional comments / suggestions below:
